

NOWSIGNAGE DATASHEET

The NowSignage CMS enables users to upload, schedule & manage content across their screens at the click of a button. Operating across every industry sector, NowSignage digital signage is ideal for single location with tens of screens, or multiple global locations with thousands of screens.

Features & Benefits*

Multi-screen content scheduling

Use the intuitive NowSignage platform to schedule content to appear on targeted screens at a specific time or day of the week. This allows users to automate the process of updating screen content to operate at maximum efficiency.

Advanced content types uploads

Upload video and image files to your asset library. The NowSignage technology then optimises your content automatically and plays in offline mode in order to maximise performance and reliance on a stable internet connection.

Social media & RSS Feed publishing

NowSignage have built in the most advanced social media search facility on the market. Integrating moderated social media content and RSS feeds into your digital signage displays hugely influences buying decisions.

In-platform App Store & Widgets

Advance your capabilities by activating approved and fully integrated Applications, such as Microsoft PowerBI, Google Traffic, Instant screen messaging...etc. Demonstrate ROI by presenting business critical information to your audience.

Security compliance & enterprise level user controls

We put security at the heart of everything we do. All data sent to the screens is encrypted and fingerprinted against known assets. Advance permissions can be utilised to assign roles and tags that grant users with the required level of control.

Product Codes:
NS005/NS006
